

# Portainer

Docker container management

All containers are in docker compose, but this is a good overview screen

```
portainer:
  image: portainer/portainer-ce:latest
  container_name: "portainer"
  volumes:
    - /var/run/docker.sock:/var/run/docker.sock
    - /mnt/user/Share/Docker/portainer:/data
  restart: always
  links:
    - traefik
  networks:
    web:
      ipv4_address: 172.18.0.253
  labels:
    - "traefik.enable=true"
    - "traefik.http.routers.portainer-web.rule=Host(`docker.kevinsloan.net`)"
    - "traefik.http.routers.portainer-web.entrypoints=web"
    - "traefik.http.routers.portainer-secured.rule=Host(`docker.kevinsloan.net`)"
    - "traefik.http.routers.portainer-secured.entrypoints=web-secured"
    - "traefik.http.routers.portainer-secured.tls.certresolver=mytlschallenge"
    - "traefik.http.services.portainer.loadbalancer.server.port=9000"
```
